CAREER IMPACT

₹1.5 Cr Vendor Recovery · ₹40–50 Lakh Risk Averted · 32% Staffing Efficiency · 45% Complaint Reduction · 25% Faster Reporting · 20+ Team Leadership

PROFESSIONAL SUMMARY

Operations analytics manager with 20+ years directing flight operations, station management and OCC/control-tower performance across international carriers. Translates complex, multi-source operational data — flight operations, passenger services, workforce and vendor performance — into real-time KPI dashboards, predictive analytics and management reporting that drives measurable efficiency gains. Applies Power BI, SQL, Python, machine learning and Generative AI to build self-service BI solutions, automate reporting workflows and enable fact-based decision-making. Experienced in stakeholder engagement, cross-functional analytics delivery and digital transformation in high-complexity airline environments.

CORE COMPETENCIES

Analytics & BI: Operations Analytics | Business Intelligence | Performance Analytics | Real-Time Analytics | Predictive Analytics | KPI Dashboards | Self-Service BI | Demand Forecasting | Capacity Planning | Workforce Analytics | Data Visualisation | Reporting Automation

Digital & AI: Power BI | SQL | Python | Machine Learning | Generative AI | Ollama | Docker | Streamlit | Advanced Excel | Platform Implementation | Systems Integration | Data Modelling

Operations: Airline Station Operations | Flight Operations | OCC / Control-Tower Operations | Turnaround Management | IROPS & Disruption Management | Operating Model Design | Process Reengineering | Transformation Roadmap Delivery | Stakeholder Engagement

Governance: Budget & P&L Accountability | Vendor & SLA Governance | Supplier Performance Management | Risk Management | Audit & Compliance | Root-Cause Analysis | Corrective Action Management

Aviation Systems: Jeppesen | Amadeus Altea | Navtech | AIMS / JOC | Flight Dispatch Systems

PROFESSIONAL EXPERIENCE

Station Operations Manager | *Uganda Airlines, Mumbai*

Nov 2023–Jun 2024

- **Improved** staffing efficiency by 32%, cut overtime by 11% and reduced passenger complaints by 45% by redesigning rosters using workforce analytics and Power BI dashboards.
- **Directed** end-to-end station operations for 20+ staff against 45-minute turnaround targets, owning a ₹2 Cr annual budget and station revenue performance.
- **Delivered** ₹3.5 lakh in cost savings within three months by integrating vendor spend data into structured audit and reconciliation workflows.
- **Safeguarded** on-time departure performance by resolving a critical fuel-payment disruption in real time across airline, airport and commercial stakeholders.

Operations Analytics Manager — Applied Projects | *Independent / Remote* Sep 2022–Nov 2023; Jul 2024–Present

- **Led** development of FlightPulse, a real-time flight-delay prediction solution translating multi-source operational data into an early-warning signal for turnaround decisions, validated at approximately 82% predictive accuracy.
- **Designed** CrewOps, a workforce scenario-planning platform enabling managers to stress-test staffing demand, shift coverage and capacity constraints against live operational inputs.
- **Architected** a Generative AI operations-intelligence assistant — selecting and implementing the platform stack (Ollama, Open WebUI, Docker) — converting raw safety and disruption data into structured, decision-ready management reporting.
- **Automated** forecasting and reporting workflows using Python, SQL, Power BI and Streamlit, improving forecast accuracy by approximately 20–25% and cutting manual reporting effort by 40–50%.

Flight Operations Supervisor | *All Nippon Airways, Chennai / Mumbai*

Jul 2019–Aug 2022

- **Cut** resource idle time by 30% and lifted manpower productivity by 23% by applying operational data analytics to resource-allocation and turnaround control.
- **Shortened** management reporting and escalation cycle time by 25% by redesigning the KPI review framework through cross-functional stakeholder workshops — introducing structured dashboards and root-cause analysis processes.
- **Orchestrated** a Chennai–Tokyo COVID-period repatriation operation, coordinating government authorities, airport teams and cross-functional airline partners under compressed timelines.

Flight Operations Officer | *Garuda Indonesia Airways, Mumbai*

Dec 2016–Jun 2019

- **Recovered** ₹1.5 Cr in vendor overbilling by building an integrated vendor-performance data process enabling systematic invoice audits, reconciliation and strengthened commercial controls.
- **Averted** ₹40–50 lakh in regulatory penalty exposure by identifying compliance gaps through structured data analysis and implementing corrective-action governance measures.
- **Negotiated** a proposed 10% vendor price increase down to 4% using evidence-based supplier performance data, preserving service continuity and operational standards.

OCC Duty Officer | *BWFS Ground Handling, Mumbai*

May 2016–Dec 2016

- **Managed** real-time allocation of bays, counters and baggage carousels across multi-airline airport operations — direct OCC/control-tower and IROPS coordination experience.

EARLIER CAREER

Assistant Flight Operations Officer — Saudi Arabian Airlines (2008–2011) | Data Service Agent — Cathay Pacific / CNS (2004–2008) | Admin & Travel Executive — Alepo Technologies (2011–2015)

Flight dispatch support, crew coordination, airline MIS reporting, corporate travel operations and vendor coordination across international aviation and technology environments.

CERTIFICATIONS & EDUCATION

Certifications: FAA Aircraft Dispatcher Certificate (USA) | Data Science with Python | Power BI & Tableau | Advanced Excel | Business Analysis | Generative AI & AI Tools

Education: BSc Computer Science, North East Frontier Technical University (2019) | MBA Marketing, National Institute of Management (2005)
