

VIKRANT THENGE

Operations Analytics Lead | Decision Systems Architect | ₹1.5 Cr+ Business Impact

+919930244221 | Vikrantthenge@outlook.com | linkedin.com/in/vthenge/ | Mumbai | github.com/Vikrantthenge/vikrant-portfolio

SUMMARY

- Operations analytics leader with 10+ years aviation operations expertise, building decision systems that transform operational data into measurable business value.
- Track record: ₹1.5 Cr cost recovery | 20-25% forecasting accuracy improvement | **40-50%** automation of manual reporting | 7 production analytics systems deployed
- Unique value: Deep operational credibility (10 yrs airline operations + FAA Flight Dispatch license) combined with strategic analytics leadership—translates operational complexity into actionable insights that drive measurable business outcomes.

SKILLS

Operations & Performance

Operational Intelligence | KPI Governance | Forecasting & Planning | Capacity Optimization | Cost Analysis | Vendor Management | Cross-functional Coordination | Network Operations

Analytics & Decision Systems

Analytics & Decision Systems | Forecasting Models & Scenario Analysis | Decision Support System Architecture | Performance Analytics | KPI Frameworks | Data-Driven Decision Making | Strategic Analytics Leadership

Domain Expertise

Aviation Operations (10+ years) | Flight Dispatch & Regulations (FAA Licensed) | Network Operations | Logistics & Supply Chain Analytics | High-volume operations management

WORK EXPERIENCE

Operations Analytics Lead

Sep 2022 - Present

Operational Intelligence Consulting

📍 Remote/Mumbai

- Led operations analytics function for 50+ aircraft network, architecting decision systems that drove ₹1.5 Cr in cost recovery and improved forecasting accuracy by **20-25%**.
- Impact & Deliverables: - Spearheaded deployment of 7 integrated analytics platforms enabling 500+ daily operational decisions for network leadership.
- Improved decision-making speed by 25% through streamlined reporting and real-time insights.
- Architected KPI governance framework and performance tracking system - Designed metrics aligned with operational realities (not theoretical KPIs) - Reduced escalation cycles by **25%**, improving accountability and decision-making speed by **10%**.

Station Operations Manager

Nov 2023 - Jun 2024

Uganda Airlines

📍 Mumbai

- Managed end-to-end station operations at a critical service hub, ensuring operational efficiency, service reliability, and **logistics operations** excellence across multiple stakeholders.
- Implemented structured workflows to improve issue resolution speed, cross-functional coordination, and ensure timely delivery at the service hub.
- Conducted operational audits to identify billing discrepancies, reducing **significant cost leakage**.
- Strengthened compliance and monitoring mechanisms, mitigating financial and regulatory risks by **₹40-50 lakh**, and assisting with **reconciliation** processes for audit accuracy.
- Leveraged operational data and reporting frameworks to identify performance gaps and support data-driven decision-making.

Flight Operations Supervisor

Jul 2019 - Aug 2022

All Nippon Airways

📍 Chennai/Mumbai

- Analyzed network-level operational performance, identifying inefficiencies in turnaround time and service delivery to improve schedule adherence
- Redesigned reporting frameworks using BI tools, reducing reporting cycle time by **25%**
- Implemented KPI tracking systems to improve **decision-making speed by 10%** and enhance operational responsiveness
- Drove process improvements and operational best practices, contributing to a **30% increase in on-time performance** and creating a **competitive advantage** in schedule reliability.
- Collaborated with cross-functional teams to resolve operational disruptions and maintain consistent service delivery
- Improved on-time performance by **30%** through optimized flight dispatch and ground operations coordination with cross-functional teams.

Flight Operations Officer

Dec 2016 - Jun 2019

Garuda Indonesia Airways

📍 Mumbai

- Diagnosed operational inefficiencies, including **delays** and **turnaround time**, by analyzing performance data to pinpoint key gaps in **service efficiency**.
- Improved visibility into operational performance by integrating data across multiple sources.
- Coordinated with cross-functional teams to minimize disruptions and maintain service consistency while focusing on scalability and client requirements for improved operational delivery.
- Implemented succession planning and managing cross-functional teams to support scalable service delivery, resulting in **25%** operational efficiencies and 03 months reduced disruption recovery time.

Early Career – Airline Operations & Travel Administration

May 2004 - Sep 2015

Cathay Pacific (CNS Services) | Saudi Arabian Airlines | Alepo Technologies

- Built foundational experience in operations coordination, service delivery, and stakeholder management across high-volume environments.
- Supported day-to-day execution of operational processes, ensuring service consistency and customer satisfaction.

ANALYTICS PROJECTS

Integrated Operations Analytics Platform Strategy

Objective: Provide network leadership with real-time operational visibility and decision support across fragmented data systems.

Approach: Partnered with operations teams to define analytics requirements. Deployed integrated decision platforms providing real-time KPI tracking, performance analysis, and forecasting insights.

Outcome: 7 platforms deployed across network and station operations. Used daily for capacity planning, schedule reliability tracking, and performance management. 25% improvement in decision-making speed. 500+ daily operational decisions enabled.

CERTIFICATION

FAA Flight Dispatch License

Data Science & Analytics

AWS Cloud Practitioner

EDUCATION

BSc – Computer Science

North East Frontier Technical University
